1) Not relevant | 2) Cold / Hot | 3) Also available as an OEM package with 30 units without knurled nuts
 4) XS = eXtreme Seal (maximum permissible foil temperature 450 °C) | 5) Also available as an OEM package with 30 units without knurled nuts / XS = eXtreme Seal (maximum permissible foil temperature 450 °C)
 6) May be operated from 1,200...1,500 W | 7) Product coming soon. Preliminary data.

01/19 OSRAM does not accept liability for errors, changes and omissions.

Light is power
 Products with a real bite
 SharXS® HTI®

Light is OSRAM

OSRAM

OSRAM

A large family with a real bite: OSRAM SharXS® HTI® and the new SharXS® Brilliant

Thanks to their modular design, all the members of the SharXS®HTI® family are masters of creative light.

Great efficiency: short-arc technology.

The SharXS®HTI® family uses state-of-the-art HTI® technology to achieve a particularly high luminous efficacy. The arc in these light sources has been reduced to 3–10 mm. What this means for you is that the SharXS® produces a higher luminance from the same wattage and therefore saves electricity and reduces your operating costs.

Capable thermal loading: eXtreme-Seal technology.

A special coating is the key. The maximum pinch temperature is 450 °C. Because they can withstand greater thermal loads, SharXS® lamps need less cooling and are therefore quieter in operation. Thanks to the higher thermal load capacity of SharXS® lamps, less cooling is required so the luminaires are quieter in operation.

Modular design: the same dimensions for all wattages within each SharXS® family.

For luminaire manufacturers, the compact modular design means a shorter time to market and lower costs.

The new SharXS® Brilliant offers:

- Natural tone of light with CRI as high as 90
- eXtreme Seal (XS) technology for improved thermal loading
- Modular design with overall length of 136 mm

SharXS®HTI® in its element

SharXS® lamps are at home in all areas of entertainment lighting:

- Shows and events
- Clubs und discotheques
- Concert halls
- TV studios
- Advertising and retail

They are ideal for intelligent luminaires:

- Moving heads
- Scanners
- Projectors
- Color changers

Successful for the past 40 years

Double-ended lamps have enjoyed great success on the entertainment market for many years. They really play to their strengths:

- Less sensitive to heat
- Always ready for a hot restart
- Allow more compact luminaire design
- Pre-focus base for accurate lamp installation
- Double-ended lamp will allow for key-lock socket feature

OSRAM lamps are compatible with entertainment fixtures from all major manufacturers. To find an ideal match for your moving head, try our lamp replacement tool that generates a list of OSRAM lamps well-suited to your fixture and gives you the option of exploring product details.
